

Power Spray

Ref. 3271

12x400ml

USE

Bardahl laboratories have developed the Power Spray to answer a market need for a multi-application product that would offer higher lubricating properties. Most multisprays are formulated from white spirit that react with old and dried oil or grease. Once the white spirit is evaporated, the treated parts are no longer lubricated neither protected against wear. Bardahl POWER SPRAY is a dry and clean lubricant, offering extreme pressure, unblocking and lubrication properties: it does not stain, does not drop, and can fulfil many different applications as chains, locks, cables, bearings, etc... In a dusty atmosphere, BARDAHL POWER SPRAY does not agglomerate dust. It repels water and forms a highly resistant anti-oxidizing film. It reduces oxidation by releasing blocked and rusted parts or mechanisms. It easily eliminates all stains of grease, oil, tar, glue,...

PROPERTIES

Bardahl Power Spray offers the following properties:

- Releases rusted parts
- Protects against wear
- Offers extreme pressure lubrication
- Has anti-oxidation and anti-moisture properties

INSTRUCTIONS FOR USE

Shake well the aerosol before use.

Spray evenly on the parts to be treated.

If used to unblock parts: wait a few minutes before releasing parts.

PHYSICAL & CHEMICAL PROPERTIES

Physical state	Liquid
Color	Translucid
Flash point	<62°C
Density	0,84 – 0,85
Solubility	Material insoluble in water
Viscosity	4,0 mm²/s (40°C)

V03/2024
