FUEL ADDITIVE

Injector Cleaner

REF. 2801
6X300ML
3266720028015

USE

BARDAHL Injector Cleaner is a specific additive formulated to clean precision injection systems. It also has excellent water dispersion properties.

It has been formulated to prevent recurring issues related to injection systems, such as clogging, moisture, and corrosion of injector nozzles.

PROPERTIES

BARDAHL Injector Cleaner has the following properties:

- Contains a blend of ash-free solvents and detergents that work to clean and lubricate intake valves and injectors,
- Restores injector flow,
- Facilitates cold starts,
- Protects the system against rust and corrosion,
- Extends the lifespan of the injection system.

INSTRUCTIONS FOR USE

Pour the contents into the tank. For optimal cleaning, pour the contents into 20L of fuel.

Drive until the fuel is completely used up, then refill.

Compatible with all gasoline engines, especially high-pressure systems.
Compatible with E10 fuel.
