FUEL ADDITIVE

Octane booster

REF. 2802
6X500ML
3266720028022

USE

BARDAHL Octane Booster has been specifically formulated to enhance the original qualities of certain low-octane fuels.

PROPERTIES

BARDAHL Octane Booster has the following properties:

- Increases the octane rating by up to 5 points, depending on the type of fuel treated.
- Enhances engine efficiency.
- Increases torque, engine speed, and power.
- Improves combustion and prevents engine fouling.
- Eliminates knocking, pre-ignition, and acceleration hesitation.
- Protects valves and seats from wear.

INSTRUCTIONS FOR USE

Pour the bottle into the tank containing 40L to 80L of fuel.

For racing use: for optimal results, pour the entire bottle into only 40L of fuel, drive and consume the treated fuel, then refuel normally.

Not compatible with E85.
